

Table of contents

The seventy-year history of the Institut de Ciències del Mar and the Unitat de Tecnologia Marina mark the beginning of the Ocean Decade: towards an inclusive and transformative ocean science	
Josep L. Pelegrí, Maria Victoria Martínez de Albéniz, Josep-Maria Gili, Jordi Sorribas..	9
The Institut de Ciències del Mar we want: marine research excellence with social commitment	
Valentí Sallarès, Josep L. Pelegrí, Josep M. Gasol, Sònia Sagristà.....	15
1. Clean ocean	
Andrea G. Bravo, Silvia G. Acinas, Cristina Romera.....	19
1.1. Ocean microbes and blue biotechnology	
Josep M. Gasol, Ramon Massana, Maria Montserrat Sala, Marta Sebastián, Ramiro Logares, Pablo Sánchez, Silvia G. Acinas	20
1.2. The history of trace metal pollution in the sediments of the Catalan Sea	
Albert Palanques, Pere Puig, Jorge Guillén.....	24
1.3. Mercury in changing oceans	
Andrea G. Bravo, Isabel Sanz-Sáez, Amina T. Schartup	27
1.4. Background noise	
Cristina Romera-Castillo, Lorenzo Bramanti	30
1.5. Marine litter, the new plague of seas and oceans	
Eve Galimany, Elena Marco-Herrero, Montserrat Ramón.....	33
1.6. International strategies and challenges for society to achieve a plastic-free ocean	
Cristina Romera-Castillo, Vanessa Sarah Salvo	36
2. Healthy and resilient ocean	
Clara Ruiz-González, Enrique Isla, Joan Navarro.....	39
2.1. The planetary organism	
Josep L. Pelegrí.....	40
2.2. The impact of the Southern Ocean on climate	
Anna Olivé Abelló, Josep L. Pelegrí	44
2.3. Life in the oceans: from the magic of the stars to the scientific knowledge of plankton	
Magda Vila, Vanessa Balagué.....	47
2.4. Microorganisms in a changing ocean	
Maria Montserrat Sala, Josep M. Gasol, Ramon Massana, Dolors Vaqué.....	50
2.5. A microbial ocean with no boundaries: connecting microorganisms within and beyond the marine environment	
Clara Ruiz-González, Marta Sebastián, Josep M. Gasol	53
2.6. Proliferations of photosynthetic organisms: two sides of the pillars of marine ecosystems	
Elisa Berdalet, Laura Arin, Magda Vila, Laia Viure	56
2.7. Symbiosis: a source of innovation for surviving a challenging ocean	
Francisco M. Cornejo-Castillo, Lucía Pita	59

2.8. Fish in the face of global change: the importance of early life stages for conservation of natural populations	
Ana Sabatés, M. Pilar Olivar, Vanesa Raya, Joan Mir-Arguimbau, Ainhoa Bernal	62
2.9. Charismatic, threatened and unknown: marine predators in the Anthropocene	
Joan Giménez, Francisco Ramírez, Marta Coll, Joan Navarro	65
2.10. Ecological integrity of the seabed: trade-off between exploitation and conservation	
Montserrat Demestre, Silvia de Juan, Alfredo Garcia-de-Vinuesa	68
2.11. The changing colours of Antarctic marine life	
Enrique Isla, Julian Gutt	71
2.12. Restoration of deep ecosystems on the Catalan margin	
Jordi Grinyó, Maria Montseny, Patricia Baena, Stefano Ambroso, Andreu Santín, Marina Biel, Guillem Corbera, Janire Salazar, Josep-Maria Gili	74
2.13. Fishermen and scientists: synergies for the exploration, conservation and sustainability of the marine environment	
Andreu Santín, Jordi Grinyó, Stefano Ambroso, Patricia Baena, Marina Biel, Guillem Corbera, Janire Salazar, Maria Montseny, Josep-Maria Gili	77
2.14. Looking with remote eyes: novel technologies for a better management of the ocean	
Francisco Ramírez, Isabel Afán, Nixon Bahamon, Marta Coll, Joan Giménez, Joan Navarro, Jeroen Steenbeek	80
2.15. Towards a renewable shipping for a resilient and healthy ocean	
Jordi Solé, Antonio García-Olivares	84
2.16. Adapting beaches for the future	
Jorge Guillén, Ruth Durán, Gonzalo Simarro	87
3. Productive ocean	
Mercedes Blázquez, Laura Arin, Blanca Figuerola	91
3.1. The heat collector-distributor ocean-atmosphere system	
Dorleta Orúe-Echevarría, Ignasi Vallès-Casanova, Josep L. Pelegrí	93
3.2. Physical basis of ocean primary production	
Jospe L. Pelegrí, Dorleta Orúe-Echevarría, Anna Olivé Abelló, Ignasi Vallès-Casanova	96
3.3. Controls of phytoplankton dynamics in the Catalan Sea	
Marta Estrada, Miquel Alcaraz, Laura Arin	99
3.4. The power of unicellular primary producers	
Pedro Cermeño, Carmen García-Comas, Caterina R. Giner, Ramiro Logares, Cèlia Marrasé, Ramon Massana, Carlos Pedrós-Alió, Maria Montserrat Sala, Rafel Simó, Javier Tamames, Sergio Vallina	102
3.5. Omics tools for managing living resources and protecting ocean biodiversity	
Francesc Piferrer	105
3.6. Animal welfare in marine science	
Mercedes Blázquez, Guiomar Rotllant, Roger Villanueva	108
3.7. The contribution of bivalves to coastal ecosystem services	
Montserrat Ramón, Eve Galimany	111
3.8. Towards monitoring and recovery of fishery-impacted species in deep-sea marine ecosystems: a joint effort between biology and technology	
Jacopo Aguzzi, Joan Navarro, Maria Vigo, Ivan Masmitja, Nixon Bahamon, José Antonio García, Guiomar Rotllant, Laura Recasens, Jordi Grinyó, Marc Carreras, Joaquín del Río, Spartacus Gomariz, Joan B. Company	114

3.9. Science and living marine resources: towards a different future	117
Francesc Sardà, Isabel Palomera	
3.10. The first fishing co-management in Catalonia: the case of the “sonso” fishery	120
Pilar Sánchez, Montserrat Demestre, Ana I. Colmenero	
4. Predictable ocean	
Marta Coll, Carolina Gabarró, David Casas	123
4.1. From sea up: oceans, air, clouds, and climate	
Rafel Simó, Martí Galí, Manuel Dall’Osto	124
4.2. Deciphering the recurrence of marine sedimentary processes	
Belén Alonso, David Casas, Gemma Ercilla, Ferran Estrada	127
4.3. Mapping the seafloor: resolution is the solution	
Ferran Estrada, Gemma Ercilla, David Casas, Belén Alonso	130
4.4. <i>Mare salis intellegere</i> . Knowing the salt of the oceans	
Nina Hoareau, Mikhail Emelianov, Joaquim Ballabrera, Carolina Gabarró, Verónica González-Gambau, Maribel Lloret, Estrella Olmedo, Marcos Portabella, Jordi Salat, Joaquín Salvador, Marta Umbert, Antonio Turiel	133
4.5. Microbial observatories: sentinels of global change	
Ramon Massana, Dolors Vaqué, Maria Montserrat Sala, Josep M. Gasol	136
4.6. Turbulence and plankton dynamics in a warmer ocean	
Miquel Alcaraz, Marta Estrada	139
4.7. Ocean chlorophyll trends in times of global change	
Francesc Peters	142
4.8. Phytoplankton and the elements of life	
Mariona Segura-Noguera, Elisa Berdalet, José Manuel Fortuño	145
4.9. What role would zooplankton play in a future ocean?	
Albert Calbet, Enric Saiz	148
4.10. The ocean recycles organic matter and sequesters carbon	
Miguel Cabrera-Brufau, Pedro Cermeno, Cèlia Marrasé	151
4.11. Studying the coastline. Understanding the border	
Jordi Camp, Eva Flo, Albert Reñé, Nagore Sampietro, Esther Garcés	154
4.12. Why do we study polar regions?	
Clara Cardelús, Vanessa Balagué, Magda Vila	156
4.13. Ocean acidification: trends, effects and what we have left to learn	
Carles Pelejero, Blanca Figuerola, Eva Calvo	158
4.14. Utility and challenges of marine ecosystem models for a better understanding and management of the ocean	
Marta Coll, Jeroen G. Steenbeek	161
4.15. Reconstructing the climate of the past to understand the climate of today and tomorrow	
Eva Calvo, Carles Pelejero	164
5. Safe ocean	
Rafael Bartolomé, Gonzalo Simarro, Marco Talone	167
5.1. Unveiling hazardous offshore geomorphological features	
Gemma Ercilla, David Casas, Ferran Estrada, Belén Alonso	168
5.2. Submarine landslides: the seafloor in motion	
Roger Urgeles	171

5.3. A shaking ocean: present and future in the study of earthquakes and tsunamis Valentí Sallarès	174
5.4. Synergies for effective coastal management to deal with marine organisms proliferations Macarena Marambio, Ainara Ballesteros, Josep-Maria Gili	177
5.5. Too extreme, or not too extreme, that is the question Marcos Portabella, Federica Polverari, Wenming Lin, Ad Stoffelen, Albert S. Rabaneda, Joe Sapp, Paul Chang, Zorana Jelenak, Giuseppe Grieco, Ana Trindade, Eugenia Makarova, Federico Cossu.....	180
6. Accessible ocean	
Jordi Sorribas, Arantza Ugalde, Jordi Isern, Ramiro Logares	185
6.1. Seventy years of marine science: from notebook to cloud data Savitri Galiana, Lucía Quirós, Elisa Berdalet, Xavier García, Emilio García-Ladona, Jordi Isern-Fontanet, Laia Viure	186
6.2. Technical support to science Joel Sans, Arturo Castellón, Jordi Sorribas	190
6.3. Geological collections: a scientific heritage David Casas, Gemma Ercilla, Belen Alonso, Ferran Estrada	192
6.4. Biological Reference Collections: a record of the past and present that is useful for the future Pere Abelló, Elena Guerrero, Ricardo Santos-Bethencourt	194
6.5. The ICM's commitment to gender equality in marine research Esther Garcés, Silvia Donoso, Elena Torrecilla, Janire Salazar, Sara Soto, Clara Cardelús, Maria Gracia Puga, Queralt Güell Bujons, Cristina González Haro, Josep L. Pelegrí, Andrea G. Bravo, Pere Puig, Mercedes Blázquez, Belén Alonso ..	196
6.6. A new generation of research vessels Jordi Sorribas, Arturo Castellón.....	198
6.7. Observing the evolution of a water particle Joaquín Salvador, Josep L. Pelegrí	201
6.8. Autonomous platforms and their applications in oceanography Pablo Rodríguez, Núria Pujol, Jordi Sorribas	204
6.9. Oceanographic cruise data management for accessible information Susana Díez, Jordi Sorribas	207
6.10. Sensing the seafloor with fibre-optic telecommunication cables Arantza Ugalde.....	210
6.11. Jellyfish prevention and post-sting tools based on R&D strategies Ainara Ballesteros, Macarena Marambio, Josep-Maria Gili	212
6.12. The emergence of iEcology and conservation culturomics for the sustainable development of our oceans Valerio Sbragaglia, Lucía Espasandín Soneira, Jeroen Steenbeek, Karen Soacha Godoy, Jaume Piera, Marta Coll.....	214
6.13. The contribution of citizen science and participatory monitoring systems to ocean knowledge and conservation Karen Soacha Godoy, Jaume Piera, Sonia Liñán, Carlos Roderó, Xavier Salvador, Raúl Bardají, Valerio Sbragaglia	217

7. Inspiring and engaging ocean	221
Pedro Cermeño, Vanessa Balagué, Carine Simon	
7.1. An opportunity for harmonic development with nature	222
Josep L. Pelegrí	
7.2. Mission Starfish 2030: Integrative and encouraging science to restore our oceans and waters under the Horizon Europe	225
Sònia Sagristà, Elena Torrecilla	
7.3. Ocean Decade. A decade towards participatory governance of the oceans	228
Vanessa Sarah Salvo	
7.4. A civil society committed to the marine environment	231
Carine Simon, Magda Vila, María Vicioso, Maravillas Abad, Josep L. Pelegrí	
7.5. The Earth's blue heart: know it to protect it	234
Elena Martínez Batalla, María Vicioso	
7.6. Ocean literacy: towards a science-literate society that is committed to the ocean	236
Janire Salazar, Josep-Maria Gili, Begoña Vendrell	
7.7. The sea explained through oceanographic campaigns	239
Vanessa Balagué, Clara Cardelús, Josep-Maria Gili, Carine Simon, María Vicioso, Magda Vila	
7.8. <i>Observadors del Mar</i> : transformative marine citizen science	242
María Vicioso, Paula López, Sandra Espeja, María García, Gemma Agell, Macarena Marambio, Joaquim Garrabou	
7.9. Artistic rigour and scientific creativity	245
Vanessa Balagué, Anna Rierola, María Vicioso	
Author index	249
Thematic index	255
