

INDEX

Prologue to the New English Edition	16
<i>Nicolás Cuenca & Pedro de la Villa</i>	
Foreword to the German Edition, 1894	19
<i>Richard Greeff</i>	
Prologue to the English Edition, 1972	23
<i>Sylvia A. Thorpe / Mitchell Glickstein</i>	

HISTOPHYSIOLOGICAL PROBLEMS OF THE RETINA

1. Visual Theories and Retinal Structure and Functions.....	33
2. Principle of the Plurality of Homofunctional Conductors (Stick Cartridges).....	36
3. The Paradox of the Horizontal Retinal Cells of Vertebrates.....	38
4. The Enigma of Amacrine Cells.....	42
5. Do eurofibrils Play an Exclusive Conductive Role in the Retina as has Been Assumed in Relation to other Organs?.....	47
6. Is There an Intraretinal Crossing of Optic Fibres?.....	50

THE RETINA OF VERTEBRATES

Preliminary Considerations	55
I. The Retina of Teleosteans	67
Layer of Visual Cells.....	70
Layer of Visual Cell Bodies.....	70
Outer Plexiform Layer.....	71
Horizontal Cell Layer.....	71
Bipolar Cell Layer.....	75
Layer of Amacrine Cells, or Müller's Spongioblasts.....	78
Inner Plexiform Layer.....	82
Ganglion Cell Layer.....	83
Optic Nerve Fiber Layer.....	85
Müller or Supporting Cells.....	85

II. The Retina of Amphibians.....	87
Layer of Visual Cells.....	88
Layer of Visual Cell Bodies.....	89
Outer Plexiform Layer.....	91
Horizontal Cell Layer.....	91
Bipolar Cell Layer.....	93
Amacrine Cell Layer.....	96
Ganglion Cell Layer.....	98
Optic Nerve Fiber Layer.....	111100
Glial Cells.....	103
III. The Retina of Reptiles.....	108
Layer of Rods and Cones.....	106
Layer of Cell Bodies of the Visual Cells.....	106
Outer Plexiform Layer.....	108
Horizontal Cell Layer.....	108
Bipolar cell layer.....	109
Amacrine Cell Layer.....	111
Ganglion Cell Layer.....	114
Optic Nerve Fiber Layer.....	117
Epithelial Cells.....	117
IV. The Retina of Birds.....	119
Layer of Visual Cells.....	120
Layer of Visual Cell Bodies.....	121
Outer Plexiform Layer.....	124
Horizontal Cell Layer.....	124
Bipolar Cell Layer.....	125
Amacrine Cell Layer.....	126
Ganglion Cell Layer.....	129
Optic Nerve Fiber Layer.....	130
Epithelial Cells.....	131
V. The Retina of Mammals.....	133
Layer of Visual Cells.....	136
Layer of Visual Cell Bodies.....	137
Horizontal Cell Layer.....	139
Bipolar Cell Layer.....	147
Amacrine Cell Layer.....	151
Ganglion Cell Layer.....	159
Optic Fiber Layer.....	164
Neuroglia.....	165

Fovea Centralis	171
Passerines	172
Chameleon.....	174
Development of Retinal Cells	179
General Conclusions	190
Explanation of the Plates.....	197

RETINAL DRAWINGS

1. Scheme of the Optic Chiasm and the Central Visual Projection in Humans	213
2. Structure of the Frog Retina	216
3. Diagram of the Neuronal Organization of the Mammalian Retina	218
4. Morphology of Human Cones and Rods	220
5. Histological Structure of the Human Retina	222
6. Perch Retina Section	224
7. Retina of a Newborn Cat	226
8. Diagram of the Structure of the Avian Fovea and the Processing of Visual Information	228
9. Comparative Diagrams of Insect, Cephalopod, and Vertebrate Retinas	230
10. Functional Diagram of the Connections between the Retina and the Principal Cerebral Centers	232
