<b>Foreword</b>	<b>xiii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Contributions . . . . .	2
1.2 Robot . . . . .	5
1.3 Publications . . . . .	5
1.4 Outline of the Thesis . . . . .	8
<b>2 Related Work and Preliminaries</b>	<b>11</b>
2.1 Localization . . . . .	15
2.2 Towards Semantic SLAM . . . . .	16
2.3 Visual Object Recognition . . . . .	17
2.4 Local Features . . . . .	26
2.4.1 Detectors . . . . .	26
2.4.2 Descriptors . . . . .	36
<b>3 Global Localization Method</b>	<b>39</b>
3.1 Panoramic Image Acquisition . . . . .	40
3.2 Panorama Matching . . . . .	42
3.3 Experimental Design . . . . .	44
3.3.1 Dataset description . . . . .	44
3.4 Results . . . . .	46
3.4.1 Re-ranking of map nodes . . . . .	48
3.4.2 Localization with 45° FOV images . . . . .	49
<b>4 Appearance-Based Homing with the Average Landmark Vector</b>	<b>53</b>
4.1 Average Landmark Vector (ALV) . . . . .	54
4.2 Related Work . . . . .	55
4.3 Experiments Performed and Results Obtained . . . . .	56
4.3.1 Simulation . . . . .	56
4.3.2 IIIA Panoramas Database . . . . .	58
4.3.3 Vardy's Panorama Database . . . . .	65
4.4 Overall Discussion of Experimental Results . . . . .	67

<b>5</b>	<b>SIFT Object Recognition Method</b>	<b>73</b>
5.1	IIIA30 Database . . . . .	74
5.2	Parameter Tuning . . . . .	76
5.2.1	Discussion and Selected Configurations . . . . .	82
5.3	Evaluation of Selected Configurations . . . . .	84
5.4	Discussion . . . . .	86
<b>6</b>	<b>Vocabulary Tree Method</b>	<b>89</b>
6.1	Databases used . . . . .	93
6.2	Parameter Tuning . . . . .	94
6.2.1	Discussion and Selected Configuration . . . . .	104
6.3	Evaluation of Selected Configurations . . . . .	107
6.4	Discussion . . . . .	108
<b>7</b>	<b>Object Recognition Method Selection with Reinforcement Learning</b>	<b>111</b>
7.1	Introduction . . . . .	111
7.2	Reinforcement Learning and its applications in Computer Vision	111
7.3	Learning to Select Object Recognition Methods . . . . .	115
7.4	Experiments and Results . . . . .	118
<b>8</b>	<b>Conclusion and Future Work</b>	<b>123</b>
