Contents

Foreword **ix**

Acknowledgments **xi**

Introduction **xiii**

I Background Notions 1

1 Triangular Norms **3**
1.1 Negations 3
1.2 Triangular norms and conorms 7
1.3 Annihilation, Rotation and Rotation-Annihilation 13

2 T-norm Based Logics **19**
2.1 Logics based on t-norms 19
2.1.1 The Monoidal T-norm based Logic MTL 19
2.1.2 Schematic extensions of MTL 23
2.2 Expansions of t-norm based logics 30
2.2.1 Delta expansions 31
2.2.2 Rational expansions 33
2.2.3 Combinations of t-norms 35
2.3 First-order logics 37

II Functional Definability 41

3 T-norm Based Logics with an Independent Involutive Negation **43**
3.1 The $\mathrm{MTL}_\sim$ logic and $\mathrm{MTL}_\sim$-algebras 44
3.2 Schematic extensions of $\mathrm{MTL}_\sim$ 47
3.3 Standard completeness 50
3.3.1 Finite strong standard completeness 52
3.3.2 Strong standard completeness 54
3.4 Predicate calculi 58

4 Ordered Fields and Ł$\Pi\frac{1}{2}$ 63
4.1 The logic Ł$\Pi\frac{1}{2}$ and Ł$\Pi\frac{1}{2}$-algebras . . . 64
4.2 Ordered fields and Ł$\Pi\frac{1}{2}$ . . . 66
4.3 Real closed fields and Ł$\Pi\frac{1}{2}$ . . . 73
4.3.1 Definable sets and definable functions . . . 74
4.3.2 Computational complexity . . . 76
4.4 Subvarieties of Ł$\Pi\frac{1}{2}$ . . . 77
4.4.1 The algebra of real algebraic numbers . . . 77
4.4.2 The lattice of subvarieties . . . 79

5 Triangular Norms Definable in Ł$\Pi\frac{1}{2}$ 81
5.1 Left-continuous t-norms . . . 82
5.2 Continuous t-norms . . . 85
5.3 Construction methods . . . 87
5.4 Completeness . . . 89
5.4.1 Continuous t-norms . . . 90
5.4.2 Left-continuous t-norms . . . 91
5.5 Decidability and complexity . . . 94

III Applications and Open Problems 97

6 Logical Representation of Uncertainty Theories 99
6.1 Logics for fuzzy measures . . . 106
6.1.1 The base logic . . . 106
6.1.2 Classes of measures . . . 111
6.1.3 Expansions: truth-constants and definability of conditional measures . . . 115
6.2 Logics for conditional measures . . . 117
6.2.1 The base logic . . . 117
6.2.2 Classes of conditional measures . . . 123
6.3 Consistency, coherence and compactness . . . 126
6.4 Comparisons with other treatments . . . 130

7 Open Problems 135

A Further Results on Uninorms 139
A.1 Uninorms . . . 139
A.2 Logics based on uninorms . . . 144
A.3 Definability of uninorms . . . 147
A.4 Decidability and complexity . . . 150
A.5 Completeness . . . 151
A.6 Open problems . . . 154

B Basic Algebraic Notions 155
