**Foreword** **xi**

**Abstract** **xiii**

**Acknowledgements / Agraïments** **xv**

**1 Introduction** **1**

**2 Universal Algebra and Algebraic Logic** **11**
2.1 Universal Algebra . . . . . 11
2.2 Algebraic Logic . . . . . 19
2.3 Some results on ordered Abelian groups . . . . . 24

**I MTL and its axiomatic extensions** **27**

**3 The logic MTL** **29**
3.1 MTL as a substructural logic . . . . . 30
3.2 MTL as an algebraizable many-valued logic . . . . . 32
3.3 MTL as a t-norm based fuzzy logic . . . . . 35
3.4 Axiomatic extensions of MTL . . . . . 39

**4 Structure of MTL-algebras** **41**
4.1 Basic definitions and results . . . . . 41
4.2 Archimedean classes . . . . . 46
4.3 The radical of MTL-algebras . . . . . 47
4.4 Standard chains . . . . . 49
4.5 Ordinal sums of semihoops . . . . . 51
4.6 Rotation and rotation-annihilation . . . . . 54

**5 Properties of varieties** **59**
5.1 Standard completeness. Methods and results. . . . . 59
5.2 Other algebraic and logical properties . . . . . 65

http://libros.csic.es

**6 Perfect and bipartite algebras** **67**
6.1 Perfect and bipartite MTL-algebras . . . . . 67
6.2 Local MTL-algebras . . . . . 71
6.3 Perfect algebras and disconnected rotations . . . . . 72
6.4 Correspondence between varieties . . . . . 73
6.5 Adding the fixpoint . . . . . 75
6.6 Conclusions . . . . . 83

**7 Weakly cancellative MTL-algebras** **85**
7.1 The property of weak cancellation . . . . . 85
7.2 The logics of weakly cancellative chains . . . . . 90
7.3 LF, FEP and FMP . . . . . 93
7.4 On standard completeness theorems . . . . . 98
7.5 Conclusions . . . . . 101

**8 $n$-contractive MTL-algebras** **103**
8.1 The $n$-contraction . . . . . 103
8.2 $n$-contractive chains . . . . . 105
8.3 Combining contraction and weak cancellation . . . . . 109
8.4 Some properties of $n$-contractive fuzzy logics . . . . . 110
8.5 Conclusions . . . . . 112

**9 Weak Nilpotent Minimum algebras** **115**
9.1 Varieties of NM-algebras . . . . . 115
9.2 Weak nilpotent minimum algebras . . . . . 118
9.3 Generic WNM-chains . . . . . 124
9.4 T-norm based axiomatic extensions . . . . . 127
9.5 Axiomatization of some t-norm based extensions . . . . . 130
9.6 Conclusions . . . . . 134

**II Partial truth in triangular norm based logics** **137**

**10 Expansions with truth-constants** **139**
10.1 Adding truth-constants . . . . . 142
10.2 Structure of $\mathrm{L}_*(\mathcal{C})$-chains . . . . . 143
10.3 Completeness results . . . . . 149
10.3.1 About SSC and FSSC results . . . . . 149
10.3.2 About canonical standard completeness . . . . . 155
10.4 Completeness results for evaluated formulae . . . . . 164
10.4.1 The case of continuous t-norms . . . . . 165
10.4.2 The case of **WNM-fin** t-norms . . . . . 168
10.5 Adding truth-constants to expansions with $\Delta$ . . . . . 171
10.6 Conclusions . . . . . 173

**11 Final conclusions and open problems** **177**
