Contents

Foreword **xiii**

1 Introduction **1**
1.1 Motivation 4
1.2 Scope and Orientation 5
1.3 Contributions 6
1.4 Overview 8

2 Preliminaries **11**
2.1 CSP 11
2.2 CSP Solving Methods 14
2.2.1 Search 14
2.2.2 Inference 16
2.3 WCSP 22
2.4 WCSP Solving Methods 23
2.4.1 Search 23
2.4.2 Inference 27

I Systematic Search **31**

3 Russian Doll Search **33**
3.1 Preliminaries 34
3.1.1 Russian Doll Search 36
3.2 Specialized RDS 37
3.2.1 A new lower bound 39
3.2.2 Future Value Pruning 41
3.2.3 SRDS upper bound 42
3.2.4 The algorithm 43
3.3 Full SRDS 46
3.3.1 A new lower bound 47
3.3.2 Future Value Pruning 48
3.3.3 The algorithm 49
3.3.4 FSRDS upper bound 50

http://libros.csic.es

3.4 Opportunistic RDS . . . 51
3.5 Experimental Evaluation . . . 53
3.5.1 Random Problems . . . 54
3.5.2 Frequency assignment problems (FAP) . . . 60
3.5.3 Combinatorial Auctions . . . 62
3.5.4 Earth Observation Satellite Management, Spot . . . 62
3.6 Related Work . . . 65
3.7 Perspectives of future work . . . 65
3.7.1 An exact RDS . . . 65
3.7.2 RDS with two parallel searches . . . 66
3.7.3 Combining Soft Arc Consistency and RDS . . . 66
3.7.4 Generalizing RDS to arbitrary relaxations . . . 67
3.8 Conclusions . . . 67

4 Pseudo-Tree Search **69**
4.1 Pseudo-tree . . . 70
4.2 CSP pseudo-tree search . . . 70
4.2.1 The CSP pseudo-tree algorithm . . . 72
4.3 WCSP pseudo-tree search . . . 73
4.3.1 The basic pseudo-tree search algorithm . . . 73
4.3.2 Refinement of pseudo-tree search algorithm . . . 74
4.4 Combining Pseudo-Tree and Russian Doll Search . . . 77
4.4.1 Specializing Pseudo-Tree RDS Search . . . 79
4.5 Experimentation . . . 79
4.5.1 Random Problems . . . 80
4.5.2 Combinatorial Auctions . . . 83
4.5.3 Earth Observation Satellite Management, Spot . . . 83
4.6 Related Work . . . 85
4.6.1 AND/OR trees . . . 85
4.6.2 Other decomposition methods . . . 86
4.6.3 Backjumping . . . 88
4.7 Perspectives of future work . . . 88
4.8 Conclusions . . . 88

II Complete Inference **91**

5 ADC with factorized constraints **93**
5.1 ADC with negative constraints . . . 94
5.2 Factoring negative constraints . . . 95
5.2.1 ADC with negative factorized constraints . . . 99
5.2.2 Variable Elimination of binary domain variables . . . 102
5.3 Experimental Evaluation . . . 105
5.3.1 Random, SAT and n-queens problems . . . 105
5.3.2 Discussion . . . 108
5.4 Related Work . . . 109

http://libros.csic.es

5.5 Perspectives of future work . . . 109
5.6 Conclusions . . . 110

6 Constraint Filtering **111**
6.1 ADC and Delayed Variable Elimination . . . 112
6.2 ADC and Constraint Filtering for CSP . . . 115
6.2.1 Constraint Filtering . . . 115
6.2.2 Adding Filtering into ADC-DVE . . . 117
6.2.3 Filtering and negative factorized constraints . . . 119
6.3 Experimental Evaluation . . . 120
6.3.1 N-Queens . . . 120
6.3.2 Schur's Lemma . . . 121
6.3.3 Discussion . . . 121
6.4 Conclusions . . . 121

7 Function Filtering **125**
7.1 From Constraint to Function Filtering . . . 125
7.1.1 Function filtering . . . 126
7.1.2 Bucket Elimination with Function Filtering . . . 128
7.2 Tree Decomposition Methods: CTE and MCTE . . . 129
7.2.1 Tree decomposition . . . 129
7.2.2 Cluster Tree Elimination . . . 131
7.2.3 Mini Cluster-Tree Elimination . . . 132
7.3 Tree Decomposition with Function Filtering . . . 133
7.3.1 Iterative MCTE with filtering . . . 136
7.4 Experimental Evaluation . . . 137
7.5 Related Work . . . 140
7.6 Perspectives of future work . . . 141
7.7 Conclusions . . . 141

8 Conclusions **143**
8.1 Conclusions . . . 143
8.2 Future Work . . . 144

III Appendixes **147**

A Benchmarks **149**
A.1 CSP benchmarks . . . 149
A.1.1 Random Binary CSP . . . 149
A.1.2 SAT . . . 149
A.1.3 Schur's Lemma . . . 150
A.2 WCSP benchmarks . . . 150
A.2.1 Random Problems . . . 150
A.2.2 Earth Observation Satellite Management . . . 151

http://libros.csic.es

A.2.3 Radio Link frequency assignment problems (FAP) of CELAR) 152
A.2.4 Combinatorial Auctions 154
A.2.5 Weighted Max-SAT 154

B Search and nary constraints **157**
B.1 The binary case 157
B.2 The non-binary case 158
B.2.1 Partial Forward Checking 159
