Foreword	xv
1 Introduction	1
1.1 Motivation	1
1.2 The Framework	4
1.3 The Goals	5
1.4 The Thesis	6
1.5 Notation	9
2 State of the Art	11
2.1 Ensemble Learning	11
2.1.1 Quantifying the Ensemble Effect	13
2.1.2 The Basic Ensemble Method	13
2.1.3 Reducing Error Correlation	14
2.1.4 Aggregating the Classifiers' Predictions	15
2.1.5 Error Correcting Output Codes	17
2.1.6 Boosting	17
2.1.7 Summary	19
2.2 Case Based Reasoning	20
2.2.1 Selection of Training Examples	21
2.2.2 Explanation Generation	27
2.2.3 Summary	29
2.3 Multi-Agent Learning	30
2.3.1 Multi-Agent Reinforcement Learning	30
2.3.2 Genetic Algorithms for Multi-Agent Systems	32
2.3.3 Multi-Agent Case Based Reasoning	33
2.3.4 Classification in Multi-Agent Systems	35
2.3.5 Summary	36
3 A Framework for Multi-Agent Learning	39
3.1 Multi-Agent Systems	39
3.1.1 Collaboration Strategies	41
3.1.2 Interaction Protocol Specification	42
3.2 Knowledge Representation and Agent Platform	44

3.2.1	The Feature Terms Representation Language	44
3.2.2	The NOOS Agent Platform	46
3.3	Multi-Agent Case Based Reasoning Systems	46
3.4	Individual Problem Solving	47
3.5	An Approach to Multi-Agent Learning	47
3.5.1	Competence Models	51
3.5.2	Justification Generation	51
3.5.3	A CBR View of the Multi-Agent Learning Framework . .	53
3.6	Summary	55
4	Committee Collaboration Strategies	57
4.1	Introduction	57
4.2	The Committee Collaboration Strategy	58
4.3	Bounded Weighted Approval Voting	60
4.4	Characterizing Committees	62
4.4.1	Individual Case Base Characterization	63
4.4.2	Committee Characterization	68
4.5	Experimental Evaluation	71
4.5.1	Committee Evaluation under Uniform Conditions . . .	72
4.5.2	Committee Evaluation with Case Redundancy	77
4.5.3	Committee Evaluation with Case Base Bias	82
4.5.4	Voting System Comparison	87
4.6	Ensemble Space Redux	90
4.7	Conclusions	92
5	Dynamic Committees	93
5.1	Introduction	93
5.2	Peer Counsel Collaboration Strategy	94
5.3	Bounded Counsel Collaboration Strategy	96
5.4	Experimental Evaluation	99
5.4.1	Accuracy Evaluation	100
5.4.2	Committee Size Evaluation	102
5.5	Conclusions	106
6	Proactive Learning for Collaboration	109
6.1	Introduction	109
6.2	Competence Models	110
6.3	Proactive Learning of Competence Models	113
6.3.1	Acquisition of <i>M-examples</i>	115
6.3.2	Induction of the Competence Models	119
6.3.3	Exemplification	123
6.4	Proactive Bounded Counsel	124
6.4.1	Proactive Bounded Counsel Policies	125
6.4.2	Proactive Bounded Counsel Protocol	128
6.5	Experimental Evaluation	129
6.5.1	PB-CCS Evaluation in the Uniform Scenario	130

6.5.2	PB-CCS Evaluation in the Redundancy Scenario	134
6.5.3	PB-CCS Evaluation in the Untruthful Agents Scenario . .	136
6.6	Conclusions	139
7	Justification Endorsed Collaboration	143
7.1	Introduction	143
7.2	Justifications in CBR Systems	144
7.2.1	Symbolic Similarity Measures	145
7.2.2	Symbolic Local Approximation and Symbolic Similarity .	147
7.2.3	Counterexamples and Endorsing Cases	149
7.3	Justification Endorsed Committee Collaboration Strategy .	151
7.4	Examination of Justifications	152
7.5	Justification Endorsed Voting System	154
7.6	Justification Endorsed Committee Interaction Protocol . .	156
7.6.1	Confidence Estimation Robustness	158
7.6.2	Exemplification	160
7.7	Experimental Evaluation	162
7.7.1	JE-CS evaluation in the uniform scenario	162
7.7.2	JE-CS evaluation in the redundancy scenario	165
7.7.3	JE-CS evaluation in the biased scenario	167
7.8	Conclusions	168
8	Case Retention Collaboration Strategies	171
8.1	Introduction	171
8.2	Multi-agent Case Retention Strategies	173
8.2.1	CBR Case Retention Decision Policies	175
8.2.2	Active Learning Decision Policies	176
8.2.3	Case Offering Decision Policies	178
8.2.4	Case Retention Strategies	179
8.2.5	Experimental Evaluation	180
8.3	Justification-based Case Reduction	188
8.3.1	Justification-based Case Utility	188
8.3.2	Justification-based Selection of Training Examples . . .	192
8.3.3	Experimental Evaluation	199
8.4	Collaborative Case Bargaining	204
8.4.1	Collaborative Case Bargaining Protocol	206
8.4.2	Collaborative Case Bargaining Decision Policies	208
8.4.3	Experimental Evaluation	211
8.5	Conclusions	217
9	Case Bartering Collaboration Strategies	221
9.1	Introduction	221
9.2	The Case Bartering Collaboration Strategy	222
9.3	Bias Based Case Bartering	223
9.3.1	Bias Based Information Gathering	223
9.3.2	Bias Based Case Bartering	225

9.3.3 Bias Based Offer Acceptance	227
9.4 The Case Bartering Interaction Protocol	228
9.5 Exemplification	230
9.6 Justification Based Decision Policies	234
9.6.1 Justification Based Information Gathering	234
9.6.2 Justification Based Case Bartering	236
9.7 Experimental Evaluation	242
9.7.1 Accuracy Evaluation	242
9.7.2 Case Base Evaluation	246
9.8 Conclusions	248
10 Conclusions	251
10.1 Summary	251
10.2 Contributions	255
10.3 Future Work	258
A Notation	261
A.1 General Notation	261
A.2 Ensemble Space Notation	262
A.3 Committees Notation	262
A.4 Voting Systems	263
A.5 Proactive Learning Notation	263
A.6 Justifications Notation	263
A.7 Retention Notation	264
A.8 Bartering Notation	265
B The NOOS Agent Platform	267
B.1 Overview	267
B.2 Knowledge Representation	268
B.3 Agent Platform	271
C Probability Estimation	277
