Contents

Foreword **xv**

Abstract **xvii**

1 Introduction **1**
1.1 Motivation and context 1
1.2 Contributions 7
1.3 Structure 10

2 Background and related work **13**
2.1 Introduction 13
2.2 Knowledge Modelling Frameworks 14
2.2.1 Generic Tasks 15
2.2.2 Role-Limiting Methods 16
2.2.3 Components of Expertise 17
2.2.4 KADS and CommonKADS 18
2.2.5 UPML 19
2.2.6 Recent issues in knowledge modelling and reuse 20
2.2.7 Conclusions 24
2.3 Software reuse 25
2.3.1 Software libraries 25
2.3.2 Component-Based Software Development 26
2.3.3 Semantic-based reuse: ontologies 27
2.3.4 Conclusions 28
2.4 Multi Agent Systems 28
2.4.1 Cooperative Multi-Agent Systems 29
2.4.2 Team Formation 35
2.4.3 Interoperation in open environments 37
2.4.4 Social approaches 43
2.4.5 Agent-Oriented Methodologies 44
2.4.6 Conclusions 48
2.5 Semantic Web services 50
2.5.1 Semantic Web Services Frameworks 51
2.5.2 Composition and interoperation of Web services 52

http://libros.csic.es

2.5.3 Conclusions 53

3 Overview of the ORCAS framework 55

4 The Knowledge Modelling Framework 65
4.1 Introduction 65
4.2 The Abstract Architecture 66
4.2.1 Components 69
4.2.2 Matching relations 80
4.3 The Object Language 87
4.3.1 The Language of Feature Terms 88
4.3.2 Subsumption 89
4.3.3 Matching by subsumption 91
4.4 Knowledge Configuration 93
4.4.1 Notation and basic definitions 93
4.4.2 The Problem Specification process 95
4.4.3 Overview of the Knowledge Configuration process 99
4.4.4 Strategies for the Knowledge Configuration process 101
4.4.5 Searching the Configuration Space 103
4.5 Case-based Knowledge Configuration 108
4.6 Configuration as reuse 109

5 The Operational Framework 115
5.1 Introduction 115
5.2 The Cooperative Problem-Solving process 116
5.3 Team model 122
5.3.1 Team-roles and team-components 123
5.4 The ORCAS Agent Capability Description Language 128
5.4.1 Electronic Institutions 132
5.4.2 Communication 134
5.4.3 Operational description 147
5.5 Team Formation 153
5.5.1 Task allocation 154
5.5.2 Team selection 156
5.5.3 Team instruction 160
5.6 The Teamwork process 162
5.7 Extensions of the Operational Framework 166
5.7.1 Interleaving Teamwork, Knowledge Configuration and Team Formation 166
5.7.2 Operational scenarios: dimensions and some prototypical scenarios 169
5.8 Conclusions 173

6 The Institutional Framework **175**
6.1 Introduction . . . 175
6.2 Overview of the ORCAS e-Institution . . . 176
6.3 Dialogic Framework . . . 178
6.4 Performative structure . . . 182
6.5 Communication scenes . . . 184
6.5.1 Registering scene . . . 184
6.5.2 Brokering scene . . . 184
6.5.3 Team Formation scene . . . 187
6.5.4 Teamwork scene . . . 191

7 Application: The Web Information Mediator **195**
7.1 Introduction . . . 195
7.2 The WIM approach to information search . . . 198
7.2.1 Adaptation of queries . . . 199
7.2.2 Aggregation of results . . . 201
7.3 WIM architecture . . . 202
7.4 The Information Search and Aggregation Ontology . . . 204
7.4.1 Items . . . 205
7.4.2 Queries, Filters and Terms . . . 207
7.4.3 Sources . . . 209
7.4.4 Query-models . . . 210
7.4.5 Item-info . . . 210
7.5 The WIM library . . . 211
7.5.1 Information Search task . . . 212
7.5.2 Elaborate-query task . . . 215
7.5.3 Select-sources task . . . 218
7.5.4 Customize-query task . . . 218
7.5.5 Retrieve task . . . 220
7.5.6 Aggregate task . . . 221
7.5.7 Elaborate-item-infos task . . . 222
7.5.8 Aggregate-item-infos task . . . 224
7.6 WIM domain knowledge . . . 225
7.6.1 Evidence-Based Medicine . . . 226
7.6.2 The MeSH thesaurus . . . 226
7.6.3 Medical sources . . . 229
7.7 Exemplification of the WIM library . . . 231
7.7.1 Query Elaboration using EBM . . . 231
7.7.2 Basic Query Customization . . . 232
7.7.3 Aggregation . . . 236
7.8 Experimental results . . . 237
7.9 Example of the Cooperative Problem Solving process in WIM . . . 239
7.9.1 Registering capabilities . . . 240
7.9.2 Problem specification . . . 241
7.9.3 Knowledge Configuration . . . 245
7.9.4 Team-formation . . . 247

http://libros.csic.es

7.9.5 Teamwork 250
7.10 Other experiments 254
7.10.1 Inter-library application 254
7.11 Conclusions 257

8 Conclusions and future work **259**
8.1 Introduction 259
8.2 Discussion 261
8.2.1 On Agent Capability Description Languages 262
8.2.2 On MAS Coordination and Cooperation 263
8.2.3 On Semantic Web Services 264
8.2.4 On the design of agent teams 265
8.3 Future work 265

A Specification of the Knowledge Modelling Ontology **269**

B Formalization of the Query Weighting Metasearch Approach **273**

C Specification of the ORCAS e-Institution **277**

D Specification of the ISA-Ontology **281**

E Specification of the ISA-Library **285**

F ORCAS Services **301**
F.1 Interaction protocols for the ORCAS services 302
F.2 Data structures and XML format 304
F.3 ORCAS services in the WIM application 306
F.4 FIPA examples 307
F.4.1 Brokering 307
F.4.2 Team formation 308
F.4.3 Problem-Solving 308
F.4.4 Cooperative Problem-Solving 309
F.5 The Personal Assistant 311

G Glossary of abbreviations **315**
